

General tutorial

<https://www.youtube.com/watch?v=eYJh5k8VQKo>

1. make sure you use correct upgrade package folder according to your theme version. How to check theme version

<https://iqitcommerce.ticksy.com/article/10034/>

2. it is mandatory to use it on **1.7.7.x**, it will not work on older version **!!!**

IMPORTANT !!! - if you have older Prestashop version please upgrade to 1.7.7.x first

Additional actions

1. After you copy files and perform upgrade action of modules go to iqitthemeditor module and click save to generate updated css file

2. instagram feed fix <https://iqitcommerce.ticksy.com/article/16771/>

3. child theme fontawesome

Copy Folder

themes\warehouse\assets\css\font-awesome to

themes\<<your child theme name>\assets\css\font-awesome
