

Module installation

Install module by backoffice tool

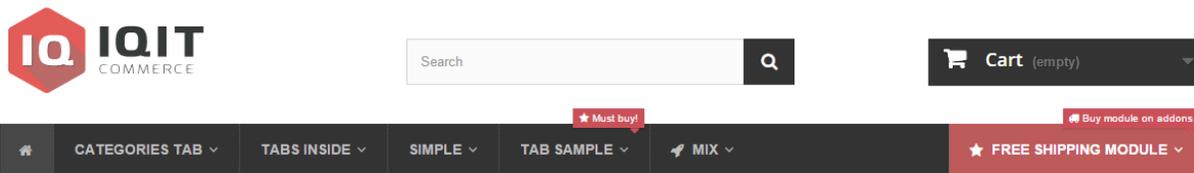

Module configuration

Go to module configuration, each option is well described.

There is video tutorial available here: https://www.youtube.com/watch?v=-m_HB1_2Bekw

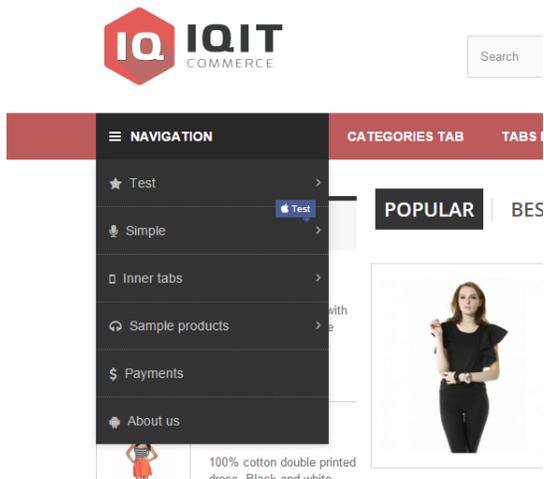

Horizontal menu

It is top bar menu. You can set colors and font option in horizontal menu settings

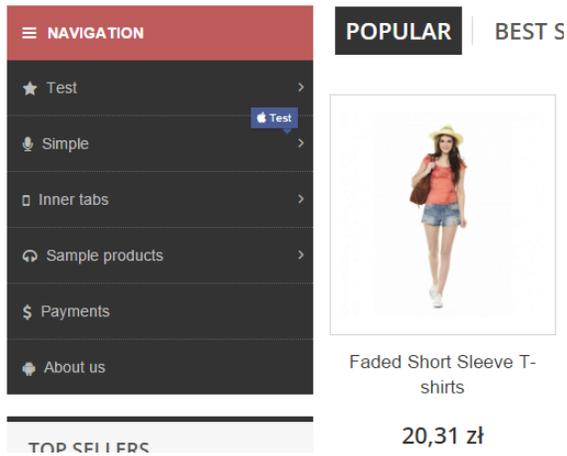

Vertical menu

Menu can be positioned on horizontal menu

Or on left column

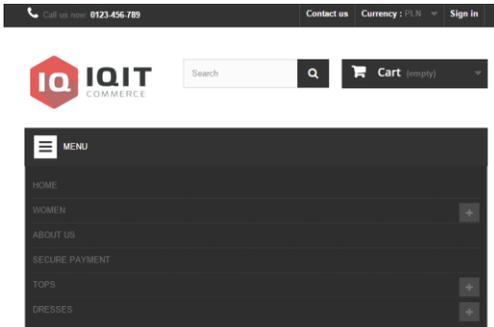

You can choose that in vertical menu settings, it is first option "Position and status"

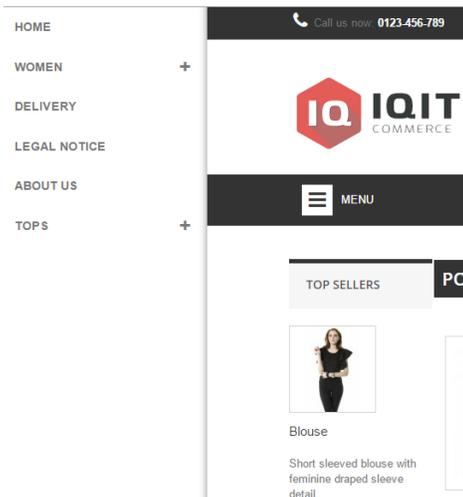

Mobile menu

You can choose from two types of design: push menu or accordion. Push menu will float from left screen side, accordion menu will be showed below.

Accordion menu

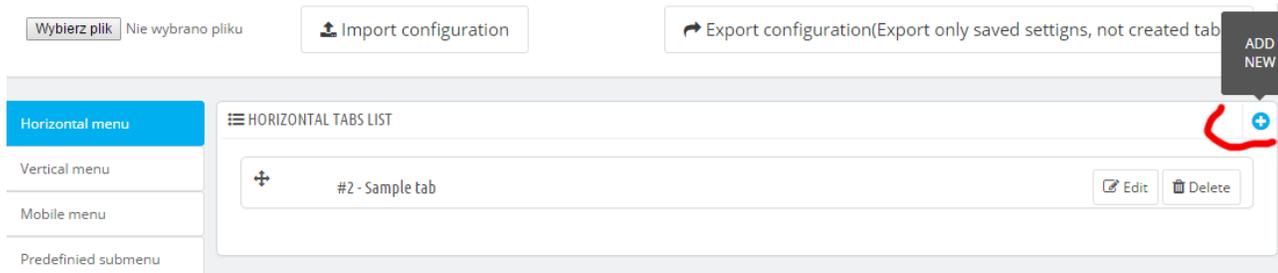

Push menu

Mobile menu is separate section to configure, with own menu positions.

Creating tabs

To create tab click on plus icon

Then you have to fill basic information like tab title, tab url, you can use optional icons. Etc

Submenu type

Submenu type and status

Submenu width

With grid submenu you will be able to create columns and row inside dropdown, if you choose predefined tabs then you will be able to select from created tabs inside “predefined tabs” section to get tabbed menu. You can also select hidden, then tab will not have a dropdown.

You can define submenu width, 12/12 width mean submenu will fill entire available width. 6/12 will fill 50% etc.

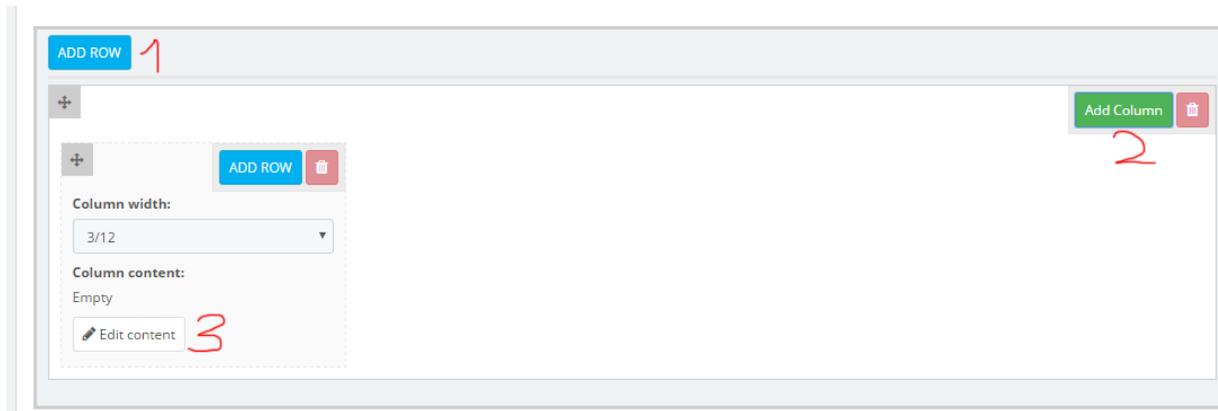

Example 1: If you want have a simple menu, just with one column, then select 4/12 width as submenu, and then set 12/12 width to created columns

Example 2: for predefined tabs we recommend 12/12 width of submenu

Example 3: if you want advanced menu select 12/12 width, and then give own width to columns

Drag&Drop grid builder

To create drag&drop submenu, select grid submenu and then: 1. Create row, 2. Add column, 3. Set content for column

You can drag a drop columns and row by cross icon

For each column in submenu you can assign content and define own style

Column title en ▾
Optional column title

Column title link en ▾
Optional link. Use entire url with http:// prefix

Title legend en ▾
Optional additional text showed in tooltip

Content type

Select links

- Homepage
- CMS**
- Home
- dsadsa
- Legal Noticeaaqcząc
- Deliver \$ && yaščćą
- Terms andašąšą conditions of use
- About us

Select view

Optional column style fields

Background color <input type="text"/>	Title border color if exist <input type="text"/>
Title color <input type="text"/>	Title hover color <input type="text"/>
Title legend background color <input type="text"/>	Title legend text color <input type="text"/>
Text color <input type="text"/>	Text hover color <input type="text"/>

Border top 1px

Border right 1px

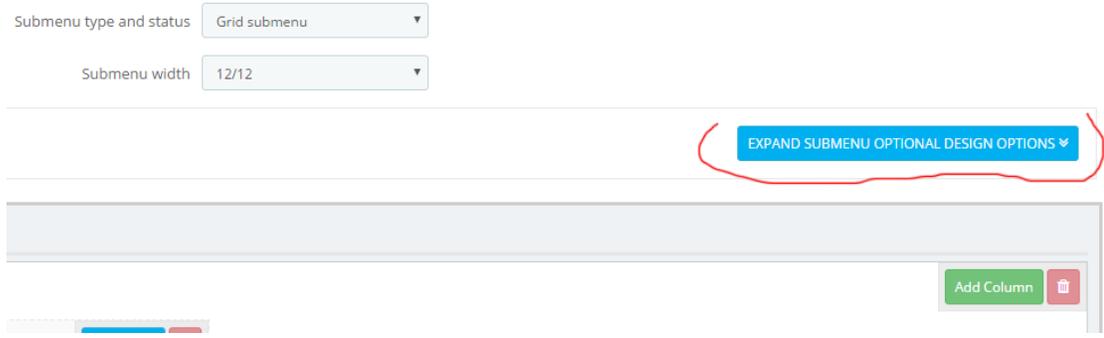

Border bottom 1px

Border left 1px

Padding Top Right Bottom Left
If you enabled borders or custom background color it maybe needed to add padding for better effect

Negative margin Top Right Left
If you enabled padding, it maybe needed to add negative margin. For example you added background and padding only in one column from a row and you want to position title on the same height as other blocks, you have to add top negative margin.

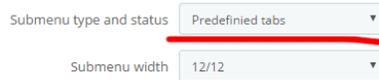

You can also set custom style for entire submenu of individual tab by clicking expand submenu optional design options. You will be able to define then own background. Colors and borders of submenu

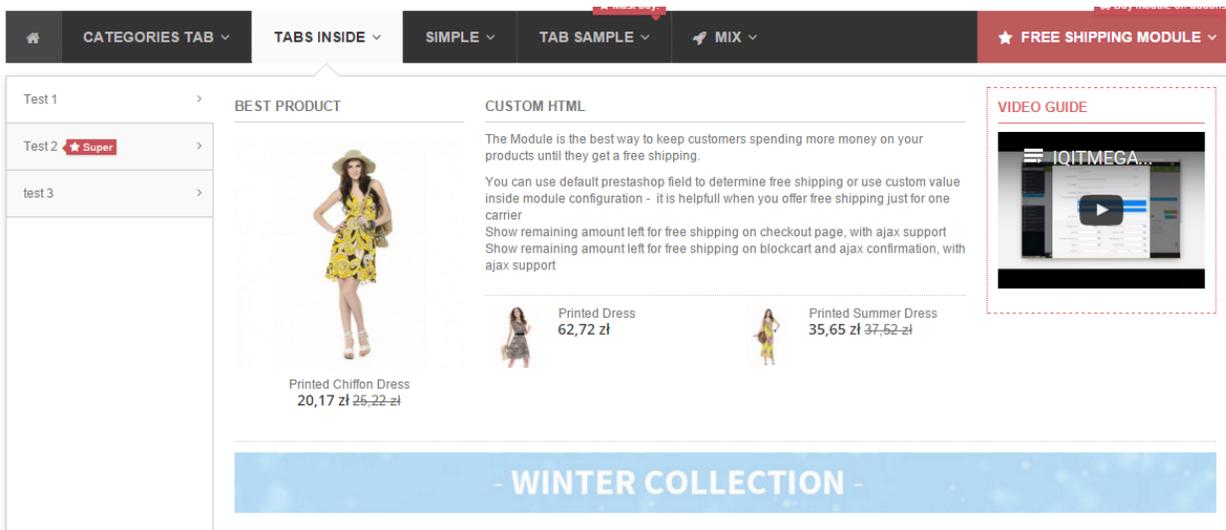

Predefined submenu tabs

You create them as normal tabs, in "predefined tabs section"

Then you will be able to choose them as tabs inside submenu

So you can get effect like this

Custom links and custom html

You can create custom links or custom html content, which you will be able to choose as content inside submenu column
